Technical Skills

Languages and DataBases: Python, C, Java, SQL, HTML, CSS, JS
Visualization Tools:UI/UX
Other Skills: Excel, Critical Thinking, Problem Solving

Experience/Projects

Inventory Management System

- Developed an Inventory Management System to track stock levels, manage suppliers, and streamline order processing, improving efficiency and reducing errors.
- Implemented key features such as real-time inventory updates, and user-friendly reporting tools, enhancing overall inventory control.

Finding Recipe for your Ingredients

- Developed a Recipe Finder Website that suggests recipes based on available ingredients, reducing food waste and simplifying meal planning.
- Integrated smart filtering and AI-powered recommendations to provide personalized recipe suggestions, enhancing user convenience and experience.

Supply Chain Management using Blockchain

- Developed a blockchain-based supply chain management system to enhance transparency, traceability, and security in logistics. Implemented smart contracts to automate transactions, reducing delays and fraud. Utilized a decentralized ledger to track product movement from origin to destination, ensuring authenticity and real-time updates.
